Subject: FW: Region 6 Site Code for Gold King Mine Spill

Just another quick FYI. Today on a call with HQ and a few of the other regions (discussing IDOT and IAG issues) - the Gold King Mine site was brought up by Tina (Van Pelt). She was unaware of R6's involvement. She asked me what site id we were charging (if we were charging R8). I told her that R6 had its own unique id since the spill involved our Region. I forwarded the site id information to her. Tina wanted to share info with Joseph Layman who I take is a HQ Budget person.

Sharing emails with you if interested.

Subject: RE: Region 6 Site Code for Gold King Mine Spill

Tina – For work in R8, we have an R8 SSID, for work in R6 we have an R6 SSID and for work in the Navajo Nation (even in New Mexico or Utah) and Arizona we charge a R9 SSID.

IFMS Id: A998

IFMS Site Name: GOLD KING MINE REGION 09 EMERGENCY RESPONSE

, NN

Type Site: Main

CERCLIS Number(s): NNN000900383

Remarks:

Subject: FW: Region 6 Site Code for Gold King Mine Spill

FYI, looks like multiple regions are working on this and Region 6 is using its own site id but Steve Pandza from Region 3 knows folks from Reg 3 using the Region 8 SSID.

Subject: Region 6 Site Code for Gold King Mine Spill

Hi Tina: Derek was deployed last Saturday to NM. Region 6 is charging **A6LS** (see his email below).

Regions 8 and 9 have different side ids.

If you need something more official from Region 6 - please let me know and I will get it to you.

Thanks,

Carolyn

Subject: RE: Question on Site Code

A6LS Gold King Mine Spill That is the one for R6. R8 has a different one. Haven't seen what if anything, R9 is using.

Subject: Question on Site Code

Hi Derek: Was a unique site code for the NM response issued for Region 6? If yes, would you please send me that code? I am on a call with OCFO and it came up as a side question. Thank you.
